SKILLS

- Languages: HTML, CSS, TypeScript, Python, Go, NodeJS
- Frameworks: ExpressJs, ReactJS, NextJS, React Native, VueJS, NuxtJS NestJS, Gqlgen, FastAPI, Fastify.
- Web Technologies: Microservices, RESTful APIs(Swagger), GraphQL APIs.
- Version Control: Git
- Development Tools: Chrome DevTools, JIRA, Docker, CI/CD
- Databases: MongoDB, PostgreSQL
- Cloud: Amazon S3 Bucket
- CSS Preprocessors: SASS, LESS

PROFESSIONAL SUMMARY

Detail-oriented and highly skilled Frontend Developer with a passion for creating visually appealing and user-friendly web applications. Proficient in frontend technologies such as HTML, CSS, and JavaScript. Strong expertise in frontend frameworks like React and Vue.js. Experienced in collaborating with cross-functional teams to deliver high-quality and responsive web solutions. Dedicated to staying updated with the latest trends and best practices in frontend development.

WORK HISTORY

Full Stack Engineer 01/2022 - Current
Humucare Agency - Birmingham, Nigeria

- Developed and maintained web applications using Typescript, ensuring efficient performance and scalability.
- Collaborated with UX/UI designers to deliver responsive and visually appealing web applications.
- Developed user interfaces using HTML, CSS, and JavaScript, with focus on clean and maintainable code.
- Utilized frontend frameworks such as React and Vue.js to build dynamic and interactive components.
- Implemented responsive designs and ensured cross-browser compatibility.
- Optimized website performance through code optimization and image compression techniques.
- Conducted thorough testing and debugging to deliver bug-free and high-quality applications.
- Worked closely with QA team to identify and resolve frontend-related issues.

Senior Contracts Engineer 01/2023 - 05/2023
Crust Africa - Abuja, Nigeria

- Lead and oversaw group of 10 mobile developers.
- Worked with all parties involved to ensure that mobile products are delivered on time.
- Established technical standards and make sure that coding guidelines and best practices are followed. to maintain code quality,
- Mentored team members, conduct code reviews, and enforce coding standards.

Full Stack Engineer 12/2021 - 05/2023
Sproutly - Delaware, USA

- Used variety of programming languages and frameworks, such as Nuxtjs (Vue.js), Node.js, Typescript, and TailwindCSS, to design and construct scalable, reliable, and maintainable web applications from front end to back end.
- Gathered requirements, defined project scope, and ensured timely delivery of web products that satisfied consumers by working with cross-functional teams that include product owners, designers, UX/UI experts, QA engineers, and other developers.
- Implemented software testing and quality assurance practices such as unit testing, integration testing, end-to-end testing, code reviews, and debugging to guarantee that web applications meet highest standards of quality and maintainability

Full Stack Engineer

01/2019 - 12/2021

Dotmac Technologies - Abuja, Nigeria

- Collaborated with finance to merging Splynx, Quickbooks API, and PayStack API.
- Ensure code quality through thorough testing, code reviews, and adherence to best practices and coding standards.
- Integrate with external systems and services, such as databases, message queues, and third-party APIs.
- Troubleshoot and debug production issues, identifying root causes and implementing timely solutions.
- Continuously research and evaluate emerging technologies and frameworks to improve development practices and enhance system capabilities.
- Collaborated with DevOps team to deploy applications, manage infrastructure, and automate deployment processes.
- Document system architecture, design decisions, and technical specifications for future reference and knowledge sharing.

Full Stack Engineer

02/2018 - 12/2018

eHealth4everyone - Abuja, Nigeria

- Responsible for designing and implementing efficient and scalable back-end systems using Golang. This included architecting solutions, writing clean and maintainable code, and ensuring high-performance execution.
- Leveraging GraphQL to design and implement efficient APIs that allowed clients to retrieve and manipulate data in flexible manner. This involved defining schemas, resolvers, and mutations, as well as optimizing query execution.
- Responsible for utilizing Docker to containerize applications, ensuring consistency and portability across different environments. This involved creating Docker images, managing containers, and deploying applications using container orchestration platforms like Kubernetes.
- Responsible for working with MongoDB NoSQL database, to store and retrieve data efficiently. This involved designing

schemas, writing queries, optimizing database performance, and ensuring data integrity.

- Responsible for writing unit tests and performing debugging to ensure reliability and stability of developed systems. This involved identifying and resolving performance bottlenecks and addressing software defects.

EDUCATION

Bachelor of Engineering: Electrical and Electronics Engineering, 04/2009 - 06/2014

Federal University of Agriculture - Makurdi, Nigeria - Second Class Upper
